

Wistron ITS_U-Senior AWS Devops Developer

Location: 221 32F., No.93, Sec. 1. Xintai 5th Rd., Xizhi Dist., New Taipei City, Taiwan

Job Category: Devops

Job Location: Taiwan

Job Description:

We are looking for an intelligent, creative, and dedicated Devops Developer in Taiwan. The developer will be collaborating in an agile team that develops and improves an AI cloud computation application. This involves extensive researching, infrastructure implementation on AWS cloud for new features and maintaining/improving of CI/CD pipelines.

Key Responsibilities:

- Build AI cloud computation platform with Serverless technology.
- Maintenance of existing infrastructures (cloud and on-premise) and support daily operations.
- Research of new tools or technologies that can bring efficiency.
- Work with engineers around the world to solve infrastructure or CI/CD issues to ensure developers can deliver their work without pain.

Requirements:

- Comfortable in English speaking and writing. Jira/Confluence documentation is in English, and English is spoken with international colleagues.
- Experience in building and deploying automation and continuous integration systems.
- Familiar with Linux system administration.
- Familiar with the building tool NPM.
- Familiar with Shell scripting and at least one of these programming languages (JavaScript/TypeScript, Python, Java).
- Familiar with AWS services (CodeBuild/CloudFront/Route53/API Gateway/Lambda/CloudFormation etc...).
- Familiar with CI/CD tools (Git, Jenkins, Docker).
- Strong organizational, documentation skills and detail-oriented work ethic.
- Initiative of discovering issues, devising and automating workflows.
- Ability to work independently and use wide variety of open-source technologies.

Plus:

- Proven record in automation building tools such as Maven, Gradle, CMake.

Education:

Bachelor / Master's degree in CS related fields is preferred but not a must.
