

Dave is looking for talented Mobile app Engineers to play an instrumental role in building products that help millions of people improve their relationship with money. As a Mobile Developer, you will bring solid experience in ReactNative, Objective-C/Swift/Java, iOS & Android SDK.

Key Responsibilities

- Work closely with our PM and design teams to define feature specifications and build products leveraging Objective-C, Java and frameworks such as React Native
- Develop mobile framework and UI based on best practices
- Provide subject matter expertise for mobile platform
- Regularly participate in code reviews and scrum team ceremonies to get work done

Experience Required

- Minimum of 3+ years of experience in modern Mobile app development technologies and 5+ years of software development with a front-end focus
- Must have hands on experience in Android development with Java/Kotlin and iOS development with Objective-C/Swift
- Effective communication skills, a positive attitude, and adaptable to feedback
- Possess a high level of attention to detail and aesthetic sensibilities
- The ability to discuss and explain system architecture and component design
- Experience with following:
 - Android SDK
 - Java/Kotlin
 - Android Studio
 - iOS SDK
 - Objective-C/Swift
 - XCode
 - Crash File Debugging for both Android and iOS
 - Apple and Google Play App Store Submission of commercial applications
 - Native app security for both Android and iOS
 - React Native
 - Third-party libraries and API integration

Preferred Experience

- Experience as a core contributor on multiple large production applications using modern mobile and Web development technologies
- Experience with Node.js, building production mobile applications in React Native
- React Native bridging with Android/iOS Native Modules
- Apple Wallet/Google Pay Push Provisioning

Keys to Success in this Role:

- Proven Mobile Application development experience
- Collaborative Team player who can deliver outstanding results in a Agile delivery model
- Creative and innovative development approach
